

Establishing Behavior Support For Students

- ✓ Support personnel need to assist IEP teams in developing plans by training teachers to write and implement effective plans.
 - Support personnel CAN NOT write all plans.
- ✓ Consider environmental context, teacher's current classroom management skills; make changes first that support all students.
- ✓ Institute behavior support plans BEFORE disciplinary crisis levels are reached.
- ✓ Behavior Support Plan should be:
 - ✍ Brief
 - ✍ Collaboratively developed
 - ✍ Blank forms should support antecedent change
 - Not focused on consequence imposition
 - ✍ Based on identifying the function of the behavior
 - ✍ Seek to alter environments to better support the student
 - ✍ Assure the student possesses an alternative replacement behavior
